ABSTRACT

The Coast Community College District (CCCD) in Southern California conducted a study to determine how representative the district and college student populations were of the primary service population. Recent increases in community college credit student fees significantly affected the defined student and service population. For the purpose of this analysis, the need to develop a consistent student population was important to establish a baseline comparison to the 1990 Census Population and Adult Educational Attainment data tables. The derived student population was defined as those 18 years of age or older at first census period of the fall semester, residing within the District's primary service region, who had not reported possession of a four-year or higher degree. The cities in the primary service region are Costa Mesa, Fountain Valley, Garden Grove, Huntington Beach, Newport Beach, Seal Beach, Westminster and the unincorporated areas (Sunset Beach, Surfside Beach, Midway City). For each of these cities, except the unincorporated areas, this report presents the following data tables: Public Law 94-171 Population Counts; 1990 Census and Adult Educational Attainment by Race and Persons of Hispanic Origin; Student Attendance, Fall 1990-Fall 1993; Educational Attainment of Persons 20 Years and Older by Race and Hispanic Origin; Student Demographics of High School Completers Without a Bachelor's or Higher Degree, Fall 1990, Fall 1991, Fall 1992, and Fall 1993; and Student Demographics for All Students, Fall 1990, Fall 1991, Fall 1992, and Fall 1993. The Issue of Student Access: Coast Community College District
Primary Service Region (Within District Cities)

Research Question: **How representative is the District and college student populations of our primary service population?**

Recent increases in community college credit student fees has significantly impacted our defined student and service population. The most recent impact being:

> *Legislative action (SB 766, 1992) in conjunction with the 1992-93 State Budget raised the community college enrollment fee for credit students with a baccalaureate degree from $6 per unit to $50 per unit (with certain exemptions) and for all other credit students from $6 per unit to $10 per unit. It also removed the 10-unit limit on courses for which students could be charged.*
>
> *Legislative action on the 1993-94 State Budget raised the enrollment fee for credit students without a baccalaureate degree from $10 per unit to $13 per unit, and continued the fee credit students with a baccalaureate degrees at $50 per unit.*

For the purposes of this analysis, the need to develop a consistent student population was important in order to establish a baseline comparison to the 1990 Census Population and Adult Educational Attainment data tables. The derived student population was defined as those 18 years of age or older at first census period of the fall semester, residing within the District's primary service region and had not reported possession of a BA/BS or higher degree during the course of their enrollment at one of our colleges.

The primary service region was defined as those cities and communities/unincorporated areas that comprise the Coast Community College District. The cities and places were defined as following: Costa Mesa, Fountain Valley, Garden Grove (total city area), Huntington Beach, Newport Beach, Seal Beach, Westminster, and the unincorporated areas (Sunset Beach, Surfside Beach, Midway City).

Clearly the three colleges share much of the same territory. Each college serves each city/place. Territorialization is not the method of operation in the Coast Community College District. The close proximity of the colleges and Coastline's "College Without Walls" operational style leans to a unique mix of operational demands to serve our student population.

Data regarding educational attainment of adults was gathered from 1990 Census, Equal Employment Opportunity File. These data are limited to cities/places of 50,000 persons or more. Because of this reason, educational attainment data tables were not generated for the unincorporated areas of CCCD or Seal Beach. Data regarding the educational attainment of persons 20 years of age or older is the nearest cut-off point to community college student populations. No significant differences in the race and Hispanic origin distributions between those 18 years and older compared to those 20 years of age or older were found. For the purposes of this analysis the use of educational attainment of person 20 years of age or older and over those 18 years of age should not be of significant consequence.

Public Law 94-171 Population Counts (Table)

The table presents several data items including: total population; Hispanic count; White (Non-Hispanic) count; Black (Non-Hispanic) count; American Indian, Eskimo and Aleut count; Asian and Pacific Islander count; and other races count. These counts and percentage are provided for the total population, 18 years old and older population, and under 18 years of age population.

Adult Educational Attainment and CCCD Student Attendance Rates (Table)

Total Population reflects the distribution of all numerated persons in the 1990 census. The young and the elderly alike. Data represents all persons as of April 1990.

The second column reflects the distribution of those persons who were 18 years of age or older at the time of the census, regardless of educational attainment.

The third column reflects the distribution of those adult persons who successfully completed high school either traditional or through other high school equivalency processes.

The fourth column reflects the distribution of those adult persons with a high school degree/completion and holder of a BA/BS or higher degree.

The fifth column reflects CCCD adult students who attended during the Fall 1993 term, reside within the District, and did not report the possession of a BA/BS or higher degree.

- Other student populations and comparison to possible 'available' populations will be derived in the future.

Educational Attainment of Adult Persons (20 Years of Age or Older) by Race & Hispanic Origin Classification (Table)

Distribution of Adult Educational Attainment with column and row percentages.

Student Demographic Data for Fall 1990, Fall 1991, Fall 1992, and Fall 1993 (Tables)

Table 1: Students 18 years of age & older, with a high school completion or equivalent, without BA/BS degree or higher.
Table 2: All Students

The second table (All Students) can be used by the colleges and/or District to compute other non-restrictive total student population to adult population comparisons within our service area.
